

Landcruising Unicorn slackline webbing (2017)

Unicorn is the all-round slackline webbing. We have placed special emphasis on safety, comfort and pleasant walking characteristics. Based on the webbing design of Core 2, we have implemented a new innovative edge design, which provides a distinctly noticeable softness. The so-called Soft-Cushion padding is located on both edges of the line and provides a significantly softer haptic under the sole of the foot. Soft Cushion also dampens the edge effect while catching the line. All in all, this offers a considerable comfort gain. The core-sheath construction combined with the very fine fabric design guarantees high resistance to dirt and abrasion. The moderate weight of 61 g together with the high stretch of 9% at 10 kN ensures easy controllability and a lot of fun with dynamic movements like bounces and surfs. Unicorn is the ideal slackline webbing for versatile applications, whether Highline, Longline or Waterline

- Material 100% Polyester
- Webbing construction: Core-Sheath with puffed edges, seamless edges, no coating
- Weight: 61 g/m
- Break strength: 32 kN
- max. Working Load Limit: 6,4 kN
- Webbing thickness: 2.7 mm
- Webbing width: 25 mm
- Stretch at 10 kN: 9%, stretch at 5 kN: 3,2 %

Kraft-Dehnungs Diagramm / Force Stretch Graph

Prüfbedingungen / Test Boundaries:

Prüfdatum / Test Date: 09.03.2017
 Prüfgegenstand / Test Specimen: Landcruising Unicorn
 Bandbreite / Webbing Width: 25 mm
 Material: 100 % PES (Polyester)
 Vorkraft / Preforce: 0,2 kN
 Dehnungswert / Stretch Value @: 10 kN
 Prüfungsgeschwindigkeit / Test Speed: 100 mm/min

Probengrafik / Test Graph:

Dehnungskennwerte / Stretch Values:
